HOW TO READ YOUR UTILITY STATEMENT:

- ① **Meter ID** – This number relates to the identification number on your water meter’s register head (see photo). For accounts with multiple meters, this number will assist you in identifying water meters for individual units or buildings.
- ② **Meter Read (Previous)** - This number represents the meter reading from the end of the previous quarter.
- ③ **Meter Read (Current)** – This number represents the meter reading from the end of the current quarter.
- ④ **Total Gallons Used** – This number represents the gallons of water used, times a thousand, during the current quarter. For example, if the total of gallons used is 15 the actual usage would be 15,000 gallons of water. On average a person uses about 80 -100 gallons of water per day.

ADDITIONAL WATER RATE INFORMATION:

The Town of Fraser provides water and sewer utility services to properties within the Town’s boundaries. Water and sewer services are billed at the end of each quarter after your service has been provided (March, June, September and December).

The Town charges a quarterly base rate of \$125.50 per quarter per tap (SFE), plus a water consumption fee of \$1.50 per thousand gallons. The sewer rates are \$131.00 per quarter per tap (SFE).

Please be aware that Town staff sometimes runs into mechanical issues which prevent them from getting a read from the water meter equipment. Many of these issues can be resolved from outside your home, but in some instances a Town staff member may need to gain access to your crawlspace or basement. In those cases, you will be contacted by the Town to arrange a time when staff can access your water meter.

To serve you better, we ask that you provide and keep current the following emergency contact information: your name, your billing address, a telephone number where you can be reached either directly, by voice mail or by a message machine which you check regularly, and an e-mail address that is checked regularly. This information is secure and never released.

Thank you for helping us to establish an emergency response customer base. Current contact information can be sent to Nancy Anderson at nanderson@town.fraser.co.us or 970-726-5491 x207.
